simple and intuitive, ideal for non-designers who want to create professional-looking content quickly. It's web-based, so no software download is needed.

must-know

Canva

Offers basic animation features but is not as focused on slide transitions or interactivity as PowerPoint. It's more about creating static or simple animated designs

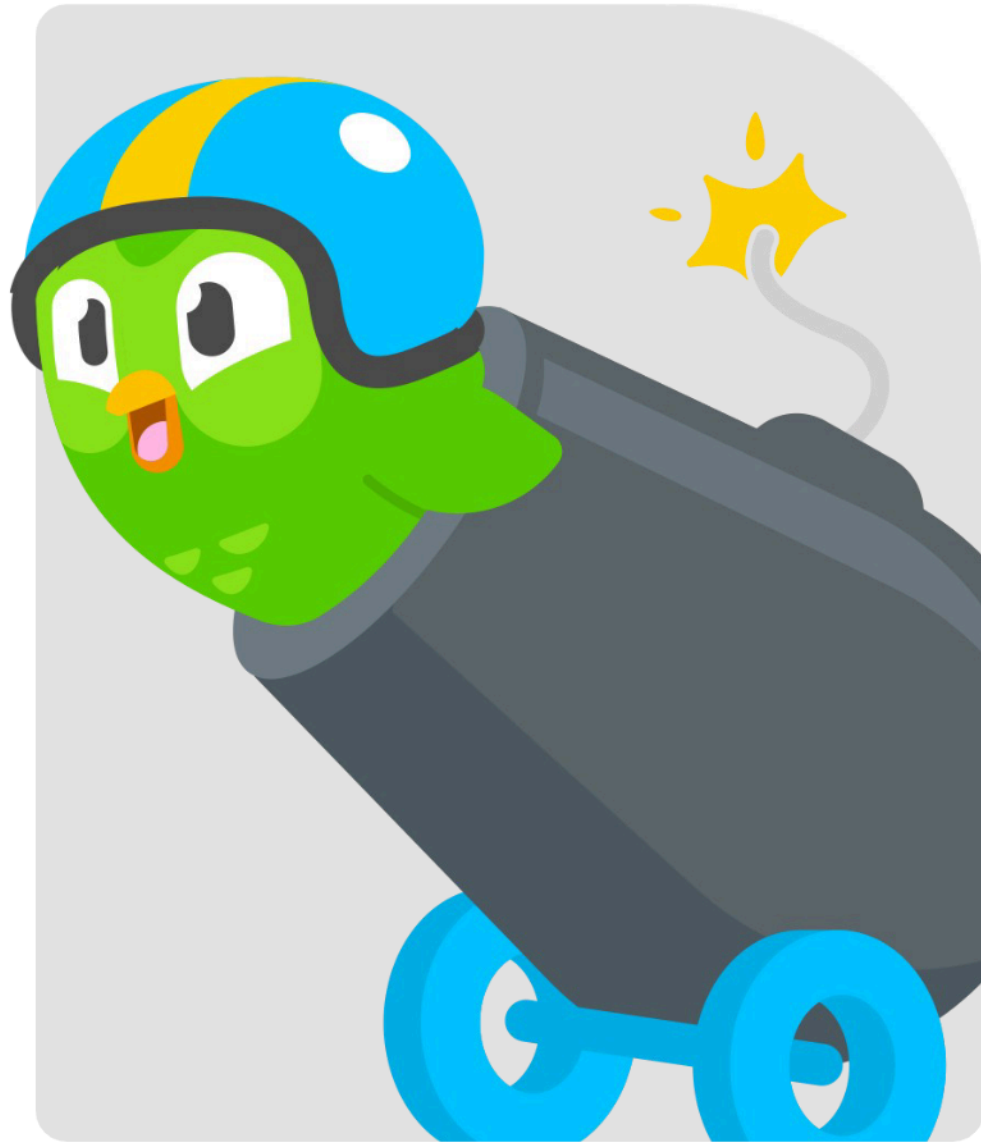

Canva

Comes with thousands of free and premium design templates, photos, icons, and fonts. It's particularly rich in pre-made designs and elements.

Powerpoint

Offers templates, but they are often more focused on traditional presentation formats. For more elaborate designs, you might need to import external assets.

Powerpoi nt

Focuses on exporting presentations in *PPTX* format but also allows export to PDF and images. PowerPoint is better suited for sharing editable slide decks for live presentations.

When you open PowerPoint for the first time...

And it feels like you're trying to defuse a bomb

Canva

- accessible for beginners
- it offers many templates and design elements without needing technical skills
- easy to modify templates with photos, icons, and fonts, promoting creative expression
- vast library of modern, visually appealing templates across various styles and themes
